<p>We appreciate the ongoing partnership between Rosa Tech and RVSCET in facilitating the recruitment and onboarding of candidates from your institution. We have successfully welcomed and onboarded many promising individuals from your college into our organization.</p> <p>I am writing to share our observations and concerns regarding some recent hires from your institution. While we have been impressed with the skills and potential of these candidates, we have encountered some challenges in retaining them within our organization.</p> <p>After successfully hiring these candidates, we made sure to provide them with clear terms and conditions of employment, including the salary structure. We were surprised to learn that a significant number of them chose to leave our organization despite no changes in the agreed-upon compensation package. This trend has raised concerns within our company as it not only affects our investment in training and development but also disrupts our operations.</p> <p>Our company invests a substantial amount of resources in training and upskilling these candidates, aiming to enhance their technological competencies and nurture their professional growth. The premature departure of these employees has hampered our workforce stability, hindered project continuity, and led to additional recruitment and onboarding expenses.</p> <p>We understand that employee turnover is a natural part of the business world, and people leave for various reasons. However, we would like to explore ways to address this issue and improve the hiring rates of candidates from RVSCET. We believe that with effective collaboration, we can work together to ensure that candidates from your institution find a fulfilling and long-lasting career at Rosa Tech.</p>	Piyush Singh	piyush@rosatech.in	7004553761	November 7, 2023 6:27 am
